

PICK PUT PEG

Games

Components:

One holding tube with two caps to close the tube and a specific number of red and blue pegs for each type of game. Pegs are stored inside each tube.

Game type:

- Trio (3 x 3) game: Four red pegs and four blue pegs
- Quad (4 x 4) game: Seven red pegs and seven blue pegs
- Penta (5 x 5) game: Twelve red pegs and twelve blue pegs
- Hexa (6 x 6) game: Seventeen red pegs and seventeen blue pegs

Playing time: 5 – 20 minutes

Ages: 8+

How to Play

Pick Put Peg™ is a challenging set of two player games of skill and strategy with increased levels of difficulty that greatly enhance the players' abilities to visualize in 3-D.

The increased challenge of the games is the fact that at all times, almost half of the playing area is obscured by the cylindrical body obliging the players to develop a mental image of the whole playing area and improve their 3-D visualization skills, strategic thinking, and attention to details

Each game type is played similarly. Players alternately place one peg in a hole. The winner is the first player that puts the pegs in a full formation – column, ring, or a diagonal.

If all pegs are inserted in the tube and one or two holes remain open, players will take turns and remove one of their pegs and place it in an open hole until the first player puts the pegs in a full formation

Game Variations

All games can be played in "Solitaire" mode with all pegs inserted in holes and one or two holes remaining open. Pegs may be removed only by jumping over it with another peg. Ideally, the game is played until only one peg is left.

Sample of winning formations for a **Quad** game.
